**Subject:** initial draft slides  
**Attachments:** AA ppt for screen discussion.pptx

Attached are my initial thoughts from yesterday morning. Feel free to edit, these are by no means anywhere near final or complete. Additional things I'm thinking we need:

A high level background slide: I will make this

Slide or two on introgression: Amanda if you could develop these that would be helpful.

I'll develop the last slide on the application and important dates

If there are specifics that are missing please let me know, there is certainly room to add more. I will talk to Mike about the Wolbachia thing, but if we need to discuss that should be just pulling slides from other presentations.

If you could both look through the slides for 3, 4, and 7-9 that would be helpful. I couldn't remember, does the trait persist for 9 or 10 generations in the lab? If you have any slides made that we can/use add pass them along.

Thanks.
